Full Stack Developer with 3+ years building production fintech systems, including a trading platform serving 100K+ users (1M+ daily requests) and an admin CRM for payments, KYC, and compliance — delivered together in 3.6 months, driving 54% revenue growth.

Expert in Python, FastAPI, React Native, and Node.js, with hands-on experience across trading APIs, payment gateways, and AI/LLM integrations.

TECHNICAL SKILLS:

- **Languages**: Python, JavaScript/TypeScript, PHP
- **Frontend**: React.js, Next.js, React Native, Tailwind CSS, UI/UX Design
- **Backend**: FastAPI (Python), Django, Node.js/Express, Laravel, REST/GraphQL APIs, WebSockets
- **Mobile**: React Native (iOS/Android), Cross-Platform Development
- **Cloud & DevOps**: AWS (EC2, S3, RDS, Lambda), Docker, Redis (Caching/Optimization)
- **Databases**: PostgreSQL, MySQL (Optimization/Sharding), MongoDB, Redis
- **Financial APIs**: MetaTrader, Payment Gateways, UPI, KYC Integrations
- **Tools & Methodologies**: Git/GitHub, Postman, Agile/Scrum, High-Performance/Microservices Architecture

---

EXPERIENCE :

Software Engineer (SDE II) - BizPay

March 2026 | Mumbai, India

- Architected a secure Django + PostgreSQL bank integration layer enabling direct, encrypted connectivity between Indian banks and enterprise clients, with standardized API abstraction for multi-bank onboarding
- Designed transactional workflows with rollback handling, audit logging, and RBI-compliant data flows across concurrent banking operations
- Extended React Native application to full cross-platform coverage (Android + iOS), unifying the codebase and resolving platform-specific navigation, permissions, and native module differences
- Integrated Google AI and third-party LLMs into production applications for contextual automation and intelligent processing workflows
- Built and deployed a production image generation pipeline for Zudio, connecting generative AI models to the client-facing product for dynamic visual content creation at scale

Software Engineer (SDE I) - Wizards

January 2025 - February 2026 | Mumbai, India

- Architected and delivered two interconnected production systems in 3.6 months: a customer-facing trading platform and an internal admin CRM for operations management

TRADING PLATFORM:

- Built high-performance Python FastAPI backend processing (350+ req/sec average, 1000+ peak) with sub-100ms latency and 99.9% uptime

- Designed and developed a complete React Native mobile application (Android) from scratch without designer support, enabling real-time trading across forex, cryptocurrencies, commodities, NSE, and MCX markets
- Integrated MetaTrader API and multiple cryptocurrency exchanges with WebSocket connections for live price feeds and instant order execution across all asset classes
- Implemented seamless payment infrastructure integrating multiple UPI gateways and international payment platforms, processing high-volume transactions with 98%+ success rate

ADMIN CRM & COMPLIANCE SYSTEM:

- Developed a comprehensive CRM with role-based access control (RBAC) supporting 12+ admin users across sales, compliance, and operations teams with granular permission management
- Built an automated KYC verification system integrating Aadhaar and PAN validation with document verification workflows, streamlining compliance for 10K+ user base

- Implemented fraud detection and risk management algorithms, identifying suspicious patterns including scalping, hedging violations, and unusual trading behaviors

- Created real-time analytics dashboards tracking business metrics, including revenue, P&L, deposit volumes, user onboarding, and team performance
- Integrated PBX calling system and WhatsApp Business API, enabling scalable customer support and sales operations

Software Engineer (SDE I) - Livnest Technologies

April 2023 - December 2024 | Mumbai, India

- Developed and maintained a revenue management system handling high-volume monthly transactions, ensuring 99.8% accuracy in financial reporting and compliance
- Implemented OAuth 2.0 authentication and role-based access control (RBAC), securing sensitive financial data for 200+ users across sales and finance departments
- Architected a hybrid database solution using MongoDB for flexible document storage and MySQL for transactional data, improving query performance by 60%
- Designed and deployed RESTful APIs and GraphQL endpoints, reducing frontend data fetching overhead by 45% through optimized query structures
- Built an automated reconciliation system, reducing manual accounting time from 8 hours to 45 minutes daily, saving 150+ hours monthly
- Collaborated with cross-functional teams using Git workflow, maintaining 95% sprint completion rate in an Agile environment. Tech Stack: Node.js, Express, MongoDB, MySQL, Redis, GraphQL, OAuth, REST APIs, Git

Front-End Developer (Internship) - JURNI MEDIA LONDON

February 2020 - March 2020

- Partnered with back-end developers and created dynamic web pages using JavaScript, resulting in website **SEO increasing by 15%.**

- Collaborated on APIs and managed software workflow using Scrum methodology, increasing task **success rate by 25%**

PROJECTS :

ClassKit - Demo: AI-Powered Educational Platform

- Built a self-hosted, AI-driven learning platform for schools using Django, DRF, and PostgreSQL, powering a hierarchical RAG pipeline (Docling + PageIndex) for accurate document retrieval
- Integrated a self-hosted LLM (Qwen 2.5 72B via LiteLLM/NVIDIA NIM) to deliver contextual, AI-generated answers from institutional content
- Designed an institutional data model (School → SubjectBucket → Document) with role-based access control for Admins, Teachers, and Students
- Implemented a pluggable agent architecture (BaseAgent registry + orchestrator) enabling extensible AI workflows, plus automated PDF/PPT generation via WeasyPrint and python-pptx
- Diagnosed and resolved core RAG retrieval failures (metadata mismatches, chunking errors, table extraction loss, hallucinations), significantly improving answer accuracy

---

EDUCATION : Nagindas Khandwala College – Mumbai | Bachelor of Computer Science (9.40/10) 2020-23
